

AIBrandSearch · Logical Flow

· Project Overview

A Streamlit dashboard that queries multiple LLM providers, tracks keyword mentions for brand monitoring, compares against Google SERP, and generates AI-powered meta-analysis.

- Complete Logical Flow

```

.                                     AIBrandSearch Pipeline
.
.
. Streamlit Sidebar Configuration
.   ... Enter search prompt
.   ... Select LLM providers (ChatGPT, Perplexity, Gemini, etc.)
.   ... Define tracking keywords
.   ... Choose country
.
.
. Click "Run Across All Models"
.
.
. .... PARALLEL QUERIES .....
.
.
.   .....
.   .....
.   ..... ChatGPT ..... Perplexity ..... Gemini ..... Grok .....
.   .....
.
.       .....
.       .....
.       ..... Bright Data API (Async) .....
.       .....   ... Trigger query .....
.       .....   ... Poll with exponential backoff .....
.       .....   ... 5-min timeout .....
.
.
. ....
.
. Normalize to LLMResult Objects
. (model_name, answer_text, status, timestamp)
.
.
.
. ....
.
.       .....
.       ..... KEYWORD PARSING .....
.       .....   ... Regex extraction of keywords .....
.       .....   ... Detect list positions (1., 2.) .....
.       .....   ... Generate ParsedSignals .....
.
.
. ....
.
