

React + Vite

This template provides a minimal setup to get React working in Vite with HMR and some ESLint rules.

Currently, two official plugins are available:

- `@vitejs/plugin-react` uses Babel for Fast Refresh
- `@vitejs/plugin-react-swc` uses SWC for Fast Refresh

Expanding the ESLint configuration

If you are developing a production application, we recommend using TypeScript with type-aware lint rules enabled. Check out the TS template for information on how to integrate TypeScript and `typescript-eslint` in your project.
