

# Python MCP Server

A **Model Context Protocol (MCP)** server for managing sticky notes · provides tools and prompts for note creation, reading, and summarization.

---

## · Features

- **·Sticky Notes** · Add, read, and retrieve latest notes via MCP tools
  - **·Summarization Prompt** · Built-in MCP prompt for summarizing all notes
  - **·MCP Compatible** · Works with any MCP client (Claude Desktop, etc.)
  - **·Lightweight** · Minimal deps, in-memory storage
- 

## .. Architecture

```
MCP Client (e.g., Claude Desktop)
  · MCP Protocol
  ·
  .....
  · FastMCP Server ·
  .....
  · Tools:          ·
  · - add_note      ·
  · - read_notes    ·
  · - get_latest    ·
  · .....          ·
  · Prompts:        ·
  · - summarize     ·
  · .....          ·
```

---

## · Getting Started

```
cd PythonMCPServer
uv sync
uv run python main.py
```

---

## · MCP Tools

|            |            |                       |                   |          |              |                          |
|------------|------------|-----------------------|-------------------|----------|--------------|--------------------------|
| Tool       | Parameters | Description           | ----- ----- ----- | add_note | content: str | Add a new sticky note    |
| read_notes | ·          | Read all stored notes | get_latest_note   | ·        | ·            | Get the most recent note |

---

## · Logic Flow

- 1 Server starts and registers tools + prompts
- 2 MCP client discovers available tools
- 3 Client invokes tools to manage notes

## · Dependencies

mcp[cli]
